

Report to the Community

Miguel "Mike" Fernandez,  
Chair, Board of Commissioners

Frank Nask,  
President/CEO, Broward Health

### Committed to our Community's Health

As the community's health system, we have a responsibility to make sure we have the healthcare professionals, facilities, medical services and technology to meet the healthcare needs of Broward County. As our population and their needs change, we must also evolve to ensure we provide the best possible care for all of our residents.

Significant investments in technology were made this year. You'll read about some of them in this report. From the CyberKnife at North Broward Medical Center to the emergency room expansions at Imperial Point Medical Center and Coral Springs Medical Center, we continue to invest in the equipment and services that allow us to better serve and treat our patients.

As one of the nation's largest public health systems – incorporating more than 30 integrated healthcare facilities, a team of nearly 2,000 physicians and 8,000 professionals – Broward Health is proud to be a leader in our industry. We're even prouder of our dedicated staff and medical experts for making us the leading health care provider in this community.

As we look to the future, we will continue to invest in new technologies that help fight disease and provide a better quality of life for our patients. We will also continue to focus on patient safety, patient satisfaction and quality improvement. We know that when people are sick, they are at their most vulnerable. They rely on healthcare professionals who provide the care they need with professionalism and compassion. That is what we strive for every day.

We are honored to be entrusted with the health of your family and loved ones. We will work hard to continue to earn and keep your trust and confidence.

### Our Mission

The Mission of Broward Health is to provide quality health care to the people we serve and support the needs of all physicians and employees.

### Our Vision

The Vision of Broward Health is to provide world class health care to all we serve.

Miguel "Mike" Fernandez,  
Chair, Board of Commissioners

Frank Nask,  
President/CEO, Broward Health

## Technology – Leading the Way

Broward Health is committed to investing in new technologies that will provide our community with the best treatment options for their health issues. In 2008, we added some of the newest, most innovative technological advances in image guided radiation therapy, breast magnetic resonance imaging and robotic surgery, putting Broward Health on the leading edge of medical technology in South Florida.

### Safer Medication

Broward Health is one of the few public healthcare systems in the nation to implement a **Barcoded Medication Administration System (BCMA)**. This records, tracks and ensures the correct medications are delivered in the prescribed dosage and time, to the right patient. With the use of a simple bar-coded wristband, patients can see the system at work and are reassured by the added safety measure. BCMA enables caregivers to work more efficiently and demonstrates Broward Health's commitment to patient safety.

### Robotic Surgery

The **da Vinci® S HD Surgical System** at Imperial Point Medical Center, transforms the way surgeons operate offering indisputable accuracy and precise surgical maneuvering by providing more dexterous movements for the surgeon by translating the hand, wrist and finger movements with surgical precision. Robotic trained urologists and gynecologists perform minimally invasive procedures such as prostatectomies, hysterectomies and myomectomies with ease and efficiency while providing patients with an easier recovery.

### Imaging – Beyond the X-Ray

Broward Health Weston and North Broward Medical Center have installed **Siemens Definition AS+ 128 Multi-Slice CT Scanners** - the world's first CT Scanners to adapt to virtually every patient and provide imaging for most types of diagnostic exams, including vessel imaging, cardiac tests and cancer staging. Its spectacular images can eliminate the need for follow-up tests.

### Looking to the Future

While many advancements were made at Broward Health in 2008, the coming years will bring even more life-saving technologies, building expansions, information technology and quality initiatives.

Here is a glimpse of what the future holds for Broward Health – and our patients.

- A new medical arts pavilion is under construction at Imperial Point Medical Center. The building, scheduled to open later this year, will include an easy-access outpatient surgery center.
- New emergency departments are underway at Imperial Point Medical Center and Coral Springs Medical Center and are scheduled to be completed in 2010.
- Scheduled to be operational in 2012 the Still River Systems Monarch-250 Proton Beam Radiotherapy System at Broward Health will be the first of its kind in South Florida. This system is regarded as the safest and most advanced form of radiation treatment available for children, as well as adults. The benefit of using protons to target tumors is simple; aimed directly at a tumor it provides a high dose of radiation and then stops entirely, minimizing damage to healthy tissue – critical when tumors are adjacent to structures like the eyes, brain or spine.

## Cancer Care

Broward Health's recent investments in advanced technologies mean that adult and pediatric cancer patients no longer have to travel out of the area to receive the most advanced care.

The Comprehensive Cancer Centers at Broward General Medical Center and North Broward Medical Center are both approved by the American College of Surgeons Commission on Cancer – accreditations held by only one out of four cancer centers; and are affiliated with the renowned Moffitt Cancer Center. This gives our patients the extra assurance that they are receiving the best possible care.

Advanced imaging is vital to the early detection of breast cancer. The Women's Diagnostic & Wellness Center at Coral Springs Medical Center is home to **breast Magnetic Resonance Imaging**. Using advanced breast MRI techniques, the sensitivity of this technology detects tumors at an earlier, more treatable stage.

The **Varian Trilogy and Varian iX Image Guided Radiation Therapy Systems** at the Comprehensive Cancer Centers at Broward General and North Broward, pinpoint tumors at the moment of treatment, providing faster and more precise treatments. This allows for the delivery of higher doses of radiation to tumor sites while sparing adjacent healthy tissues.

Broward County's first and only **CyberKnife®** at North Broward Medical Center allows for pain-free treatment of tumors that were once considered "inoperable". This non-invasive alternative to conventional surgery works with sub-millimeter accuracy and unsurpassed flexibility tracking for tumors in the brain, spine, lungs, liver, pancreas and prostate. It delivers radiation beams with a superior range of positions allowing access to a tumor from any direction.

## Cardiac Services

Broward Health offers patients the medical care and expertise of the finest cardiac physicians and specially trained cardiac nurses. The Heart Center of Excellence, the hub of our cardiac services, has been distinguished as one of the nation's top centers for cardiovascular treatment and is leading the way in cardiac treatment with new technology and the finest specialists.

The recent acquisition of 128 Multi-Slice Scanners at Broward Health Weston and North Broward Medical Center means our patients have access to the best and latest technology to pinpoint all types of heart problems. It offers safer procedures with significant reduction in radiation exposure and unprecedented image quality.

Coral Springs Medical Center and Imperial Point Medical Center offer the 64 Slice CT Scanner. This scanner shows precise three dimensional images of carotid vessels, as well as vessels in the abdomen and extremities to diagnose atherosclerosis, stroke or heart attacks. The scanner is able to assess heart function or locate cardiac calcium deposits showing blockages and plaque.

## Sleep Disorder Centers

Relief for sleep problems can be found at the Sleep Disorders Centers at Broward General Medical Center, North Broward Medical Center, Coral Springs Medical Center and Broward Health Weston. Comprehensive facilities provide physician evaluations, state-of-the-art diagnostic testing and treatment for sleep-related disorders in a comfortable home-like atmosphere.

Broward General's Heart Center of Excellence recently received Pediatric and Fetal Accreditation from the Intersocietal Commission for the Accreditation of Echocardiography Laboratories, and has one of only four ultrasound technologists in Florida with adult, pediatric and fetal certification.

## Orthopedics

Broward Health's system-wide team of nationally and internationally-recognized orthopedic physicians have access to the latest technology and treatment options for orthopedic injuries. Orthopedic sports medicine services focusing on the diagnosis, treatment, rehabilitation and prevention are available at each of our medical centers.

Broward General Medical Center and North Broward Medical Center each offer a dedicated Joint Replacement Center providing pre- and post-operative education and services. Both provide a full range of orthopedic services, including anterior hip replacement surgery – a less invasive approach traditional hip replacement. Future plans call for a Sports Medicine Center adjacent to Broward General.

The Coral Springs Medical Center orthopedic team specializes in sports, spine, hand, reconstructive procedures, gender-specific knee replacement for women and mini-incision hip replacement surgery. Imperial Point Medical Center's orthopedics and sports medicine program brings together physicians, surgeons, athletic trainers and physical therapists to diagnose and treat orthopedic problems and sports injuries.

## Neurological Services

Broward Health's Neurological Institute at North Broward Medical Center specializes in the evaluation, treatment and rehabilitation of a full range of neurological problems, including Alzheimer's and Parkinson's disease, sleep disorders, stroke, dizziness and balance disorders, and head and spinal cord injuries. The new Memory Enhancement Program provides an innovative, education program for people with age-related memory concerns who wish to improve or maintain their memory by getting participant to use different ways of thinking.

Broward General and North Broward both are nationally-certified as a Primary Stroke Centers due to their comprehensive program, specialized staff and rehabilitation services. Coral Springs and Imperial Point are in the process of added dedicated stroke centers.

## Wound Care

Medical experts with advanced training in wound care offer patients the latest treatments for chronic wounds caused by diabetes, circulatory problems and other conditions. The Centers for Wound Care and Hyperbaric Medicine at Imperial Point Medical Center and Coral Springs Medical Center speed healing through the use of hyperbaric chambers. North Broward Medical Center's wound care center uses a multi-specialty approach to maximize healing using physical therapy, radiation pain management and nuclear medicine.

- North Broward Medical Center's comprehensive stroke center is the first hospital in Florida to attain Joint Commission Certification for stroke rehabilitation and has earned the Gold Seal of Approval as a Primary Stroke Center.

## Children's Services

Broward Health facilities provide family-centered care for newborns, neonates, children and youth. Our healthcare teams include pediatricians representing dozens of sub-specialties and pediatric nurses dedicated to serving the needs of children and their families.

### Chris Evert Children's Hospital

The Chris Evert Children's Hospital offers a complete range of services for pediatric patients. For the tiniest patients, the Giraffe Omnibed in the neonatal intensive care unit allows 360-degree access to newborns, keeping their temperature regulated, and avoiding environmental changes which can be hazardous for their fragile systems. The pediatric sedation unit, winner of the prestigious Ernest Amory Codman Award, is recognizing for excellence in the quality and safety of health care. To assist families who travel to the Chris Evert Children's Hospital, Broward Health and the Ronald McDonald House of Fort Lauderdale offer patient's families a temporary residence while their child undergoes treatment.

### Children's Services at Coral Springs Medical Center

Children's services at Coral Springs Medical Center include neonatal and pediatric intensive care units, ER for Kids, pediatric rehabilitation and pediatric sub-specialties including orthopedic surgery. Camp Koral Kids offers a fun environment for diabetic kids ages 5 ½ - 11 years where they can learn more about diabetes, interact with other diabetic kids and just be a kid.

### Pompano Pediatric and Prenatal Care

The Pompano Pediatric Primary Care Center and Pompano Prenatal Care Center provide quality and comprehensive healthcare to young patients. Services include physical examinations/school physicals, immunizations, nutritional counseling and referrals for specialty care.

### Children's Diagnostic & Treatment Center

Established in 1983 when Broward County had one of the highest infant mortality rates in the country, Children's Diagnostic & Treatment Center began with a staff of three in a small room in Broward General Medical Center and has since grown to be the largest nationally-recognized non-university clinical research program in the nation. It provides comprehensive prevention, intervention and treatment services to children and youth with special healthcare needs and high risk or chronic medical problems. Administered in a family-centered and culturally sensitive environment, programs and services include infant mental health services, counseling services for new mothers, sleep-away camp for children with HIV, pharmaceutical and nutritional counseling and home visitation programs.

## Caring For Our Community

### Transitional Sickle Cell Day Treatment and Wellness Center

The center is designed to improve the quality of life for sickle cell patients aged 18 and older as they transition from pediatric to adult care for their disease. The eight-bed center was created through the generosity of the Health Foundation of South Florida and a donation from the 2007 Annual Mayor's Gala.

### Kinship Care

In Broward County, an estimated 2,000 children whose parents can't care for them live with extended family or family friends. Often these caregivers do not have access to the financial, legal and health benefits available within the foster care system. The Kinship Care Initiative, administered by Broward Health, is a partnership between social service agencies, legal aid and county health systems.

### Community Health Services

More people in our community than ever before are concerned with issues relating to healthcare access and affordability. For more than 55 years, Broward Health has served as a safety net for the uninsured and underinsured through our neighborhood-based primary care centers and school-based health centers. Centers such as Clinica de las Americas and the Seventh Avenue Family Health Center provide a complete continuum of care including prevention and education, outreach, case management, urgent care, dental care, home health care, hospice and much more. A dozen locations are dedicated to serving primarily the indigent and poor.

### Disease Management

Disease State Management programs provide resources and information to improve quality of life and reduce complications associated with chronic medical conditions such as diabetes, high blood pressure, heart failure, asthma or HIV/AIDS. The program offers one-on-one evaluation, personal care plans, case managers, health experts, nutritional counseling and specialized training on medical equipment needed to manage chronic medical conditions.

### School-Based Health Centers

Designed to meet the needs of the students, their families and neighborhood residents, school-based centers were established in 1994 in collaboration with the Broward County School Board. Broward Health's three school health centers offer treatment of common injuries and illnesses, health and nutritional counseling, family planning and counseling, behavioral health services and social services.

### Healthcare for the Homeless

Established through a grant from the federal government, the Health Care for the Homeless Program has been staffed and financially supported by Broward Health since 1993. The program offers a wide array of services to the homeless population at various locations throughout Broward County. Services are delivered by mobile and fixed health care teams of physicians, nurse practitioners, registered and licensed practical nurses, and other professional personnel.

BrowardHealth.org was a Gold Winner in the 2008 Hermes Creative Awards for Website overall and also received a FSHPRM Mark of Excellence Award -- (Florida Society of Healthcare Public Relations and Marketing) for Best Web-based Marketing.

### Gold Coast Home Health and Hospice Services

Gold Coast Home Health and Hospice Services offers patients a full spectrum of services to meet their home health and hospice needs. A Medicare and Medicaid certified agency with accreditation from the Community Health Accreditation Program (CHAPS), the staff ensures quality and consistency of care while working closely with the patient and their physician to develop a plan of care specially tailored to meet the needs of each individual patient.

### Community Outreach

Broward Health provides a variety of special events, health screenings, immunization and education programs through Broward Health medical centers and Community Health Services. In addition, many free community health lectures are held throughout the year. A listing of community outreach events is available on the Broward Health Web site at [www.browardhealth.org](http://www.browardhealth.org).

### Mobile Mammography

Provided in cooperation with the Area Agency on Aging, the Mammovan provides breast cancer screenings and education to women who otherwise might not have access or the means to pay for these services. The van offers services throughout Broward County at churches, community centers, retirement homes and assisted living centers. In 2008, the van provided 1,700 mammograms.

### Health Line & Physician Referral Line

Multi-lingual Health Line representatives are available to provide physician referrals or answer questions regarding managed care options. Health Line offers callers the ability to register for classes, obtain information about lectures, or join one of the Senior Supper Clubs or Mall Walkers groups. Health Line is open Monday through Friday, 7:30am to 4:30pm. Please call 954.759.7400 or e-mail [healthline@browardhealth.org](mailto:healthline@browardhealth.org).

### Award-Winning Web Site Offers Health Information

Want to research a health question? Need to schedule an appointment with a physician? Want to stay in touch with loved ones during a hospital stay? BrowardHealth.org is the only Web site needed for health information in Broward County. It offers a comprehensive health encyclopedia in English and Spanish, electronic newsletters, breaking news headlines, interactive quizzes, surgery animations and podcasts. The new Broward Health Web site also lets the community connect with fellow patients, physicians, and community members through blogs, forums, and media galleries. [www.browardhealth.org](http://www.browardhealth.org)

### Speakers' Bureau

Broward Health experts are available to talk to civic and professional groups about virtually every medical or health-related topic. To schedule a speaker, please visit [www.browardhealth.org](http://www.browardhealth.org) or call the Broward Health Line at 954.759.7400.

### Broward Health Physician Group

Whether it's for a common cold or a complicated cardiac surgery, Broward Health physicians are among the most highly rated physicians in Broward. With practices specializing in pediatrics, internal medicine, orthopedics, cardiology, oncology, internal and family medicine, endocrinology, neurosurgery and sports medicine, Broward Health has a primary care physician or a specialist to meet just about every healthcare need.

Please visit [browardhealth.org](http://browardhealth.org) for more information about Broward Health physicians or call the Broward Health Line at 954.759.7400 for a physician referral.

## Broward Health Foundation

### Bridging the Gap by Bringing the Community Together

The Broward Health Foundation is the fundraising arm of Broward Health. The Foundation raises funds through individual, corporate and planned gifts, annual fund campaigns, special events and more. Donations to the Broward Health Foundation help bring the most advanced technology and medical innovations, as well as staff support, to our hospitals.

The Foundation received many notable gifts last year, including a \$4.5 million gift towards the construction of the 7,500 square-foot Lillian S. Wells Foundation Women's Health Pavilion at Broward General Medical Center. When complete, it will offer the most advanced technology for gynecological services, breast MRI, digital mammograms, bone density screenings and more. This is the second major gift from the Lillian S. Wells Foundation; the first gift of \$1 million was used to purchase digital mammography equipment. Also, the Marie B. Fisher Trust made a donation of almost \$200,000 which will benefit the Chris Evert Children's Hospital. Those funds will be used towards the \$70 million expansion and renovation currently underway.

A number of special events were held that also raised money for the Broward Health Foundation, including the annual Broward Health Golf Tournament, the inaugural Celebration of Smiles motorcycle ride, Jingle Bell Jog and the Race for Women's Wellness. The hospital auxiliaries continued their fundraising efforts as well, with the Broward General Medical Center Auxiliary contributing \$163,000 for the purchase of a Mobile C-Arm (mobile surgery system), the North Broward Medical Center Auxiliary contributing \$100,000 for the purchase of emergency department monitors and the Coral Springs Medical Center Auxiliary contributing more than \$90,000 to refurbish the West Pediatric Department, purchase lobby furniture and a recumbent cross trainer for the outpatient rehabilitation department. The Imperial Point Auxiliary contributed more than \$96,000 for new ultrasound equipment, stretchers and recliners.

Additionally, the Foundation reactivated the Children's Advisory Council and also created the Foundation's Board of Directors. There are many opportunities to donate to your community's hospital system and the staff at the Broward Health Foundation looks forward to assisting anyone interested in donating to Broward Health.

**THE BEST JOINT TO REPLACE YOUR JOINTS.**

**BROWARD HEALTH**  
**POWERFUL ORTHOPEDICS**

If joint pain is keeping you from your normal activities, you should know that Broward Health performs the most joint replacements in Broward County. In fact, we handle the most orthopedic cases period. And when you trust your care to us, you'll have more treatment options, including advanced non-invasive techniques like computer-assisted arthroscopy and hip resurfacing. From high-school athletes to weekend warriors to senior citizens, Broward Health has the expertise to reduce pain, improve mobility, and get you back doing the things you love.

**For a referral to an orthopedic specialist near you, go to [BrowardHealth.org](http://BrowardHealth.org) or call 954.759.7400**
